

Cheryl Wintheiser III

Class: Expert
Origin: Human
Homeworld: -
Goal: -

Level: 1
Background: Noble
Languages: Mandate

STR 14 +1	HP 6	Saving Throws:
DEX 14 +1	AC 14 vs TL3 weapons	Physical 14
CON 15 +1	AC 14 vs TL4+ melee weapons & firearms	Evasion 14
INT 14 +1	Move 10m (Unencumbered)	Mental 14
WIS 11 +0	Base Attack +0	
CHA 15 +1	System Strain max 15, permanent 0	

Attributes were rolled randomly (3d6 each, in order, set one to 14).

Class Abilities: Once per scene, you can reroll a failed skill check, taking the new roll if it's better.

Skills: Administer-0, Lead-0, Pilot-1, Shoot-0, Talk-1

Foci: Diplomat-1, Starfarer-1

Equipment

- **Readied:** Armored Undersuit, Backpack (TL 0), Compad, Laser Pistol, Lazarus Patch, Monoblade Knife, 3 x Power Cell (type A), 3 x Tailored Antiallergens
- **Stowed:** 6 x Power Cell (type A)
- **Cached:** -
- **Credits:** \$55

Readied Items: 5 (Unencumbered: up to 7, Light Enc: up to 9, Heavy Enc.: up to 11)

Stowed Items: 2 (Unencumbered: up to 14, Light Enc: up to 18, Heavy Enc.: up to 22)

Armor

- **AC 14 vs low-tech (TL3 or lower) weapons:** Readied Armored Undersuit gives base AC 13; Dexterity gives +1 AC
- **AC 14 vs high-tech (TL4 or higher) melee weapons and all firearms:** Readied Armored Undersuit gives base AC 13; Dexterity gives +1 AC

Ranged Weapons

- **Laser Pistol:** +2 to hit, 1d6+1 dmg, rng 100/300, mag 10, ash or sand cloud applies up to a -4 to hit and halves range., TL 4, TL 4

Melee Weapons

- **Monoblade Knife:** -1 to hit, 1d6+1 dmg, Shock 2pts/AC15, TL 4, TL 4
- **Unarmed Attack:** -1 to hit, 1d2+1 dmg, Unarmed attacks always add the attacker's Punch skill to damage rolls, unlike other weapons., TL 0, TL 0

Foci

- **Diplomat:** You know how to get your way in personal negotiations, and can manipulate the attitudes of those around you. Even so, while smooth words are versatile, they'll only work if your interlocutor is actually willing to listen to you.
 - **Level 1:** Gain Talk as a bonus skill. You speak all the languages common to the sector and can learn new ones to a workable level in a week, becoming fluent in a month. Reroll 1s on any skill check dice related to

negotiation or diplomacy.

- **Starfarer:** You are an expert in the plotting and execution of interstellar spike drills. While most experienced pilots can manage conventional drills along well-charted spike routes, you have the knack for forging new drill paths and cutting courses too dangerous for lesser navigators.
- **Level 1:** Gain Pilot as a bonus skill. You automatically succeed at all spike drill-related skill checks of difficulty 10 or less.

Equipment Descriptions

- **Armored Undersuit:** An armored undersuit is a skin-tight bodysuit woven of advanced TL4 fibers with exceptional shock-activated rigidity and impact dispersion capabilities. Transparent panels allow for it to be worn with almost any outfit without drawing notice or being detected without a close tactile examination. (enc. 0)
- **Backpack (TL 0):** A worn backpack counts as a readied item, though objects stowed inside it still require the usual round to dig free. Characters without backpacks or similar carrying devices might have difficulty justifying the hauling of large amounts of gear. (enc. 1)
- **Compad:** One of a host of different hand-held portable communications devices. Most TL4 worlds have global comm coverage, but primitive worlds render these devices useless without a nearby comm server to provide connectivity. (enc. -)
- **Laser Pistol:** Laser pistols are among the most common type of energy weapon, though pistols are considerably less energy-efficient than rifles. Depending on the tech used in the sector, they might produce silent, invisible beams of death or noisy, brightly-colored streaks of lethal light. The phased multifrequency beam is capable of penetrating any ordinary mist or haze, but a thick cloud of thermally-resistant particulate matter such as ash or sand can seriously degrade the beam, applying up to a -4 penalty to hit and cutting ranges in half. (enc. 1)
- **Lazarus Patch:** A vital tool for adventurers, the Lazarus patch is a heavy compress laced with antibiotics, coagulants, system stabilizers, plasma, and a oneshot diagnostic suite. If the patch is applied to a character that has fallen to 0 hit points, the user can make an Int/Heal or Dex/Heal skill check against difficulty 6 to stabilize the subject. The more time between injury and application, the less chance the patch has to work. Each round after the first, an additional -1 penalty is applied to the skill check. The patch is no use after six rounds. If the medic fails the first skill check, they can keep trying the check once per round until the victim is revived or time runs out. Lazarus patches are no use on victims that have died of disease, poison, or have been mangled beyond surgical repair by Heavy weapons or similar trauma. Only one patch can be applied to a victim. Revived victims are critically wounded until sufficient medical help has been tendered; see the Systems chapter for details. (enc. 1 for 3)
- **Monoblade Knife:** Small weapons are small one-handed implements no larger than a baton or knife. These weapons are easily concealed in normal clothing, and can even be kept Readied up sleeves or in tailored pockets. Many can be thrown at a range up to 10 meters. (enc. 1)
- **Power Cell, type A:** One of the few standardized artifacts inherited from before the Silence, power cells are small cylindrical objects designed to take and hold electrical charges. Type A cells are usually used for personal equipment, and the larger type B cells for vehicles and heavy gear. The engineering for the cells is substantially different, and they cannot be exchanged or recharge each other without a trained tech's modifications or a converter unit. Power cells can be recharged off a ship's power plant or other grid. Recharging requires 30 minutes for a type A cell. (enc. 1 for 3)
- **Power Cell, type B:** One of the few standardized artifacts inherited from before the Silence, power cells are small cylindrical objects designed to take and hold electrical charges. Type B cells are usually used for personal equipment, and the larger type C cells for vehicles and heavy gear. The engineering for the cells is substantially different, and they cannot be exchanged or recharge each other without a trained tech's modifications or a converter unit. Power cells can be recharged off a ship's power plant or other grid. Recharging requires 30 minutes for a type B cell. (enc. 1 for 3)
- **Tailored Antiallergens:** A dose of tailored antiallergens can be used to render a local world's organics largely edible by humans and its atmosphere breathable without severe allergic reactions. While many worlds have been

seeded with Terran life forms or have produced organics that are edible by humans, others are toxic without the appropriate chemical augmentation. A dose of these antiallergens lasts for twenty-four hours. (enc. -)

- **Unarmed Attack:** Unarmed attacks reflect ordinary kicks and punches. Unarmed attacks always add the attacker's Punch skill to damage rolls, unlike other weapons. Kinesis wraps, spiked knuckles, and other small fist weapons may be treated as small advanced or primitive weapons that use the Punch skill and add the skill level to their rolled damage, but not to Shock. Such weapons do not augment a hero with the Unarmed Combatant focus. (enc. 0)

Skills

- **Administer (Level 0):** Manage an organization, handle paperwork, analyze records, and keep an institution functioning on a daily basis. Roll it for bureaucratic expertise, organizational management, legal knowledge, dealing with government agencies, and understanding how institutions really work.
- **Connect (Untrained):** Find people who can be helpful to your purposes and get them to cooperate with you. Roll it to make useful connections with others, find people you know, know where to get illicit goods and services, and be familiar with foreign cultures and languages. You can use it in place of Talk for persuading people you find via this skill.
- **Exert (Untrained):** Apply trained speed, strength, or stamina in some feat of physical exertion. Roll it to run, jump, lift, swim, climb, throw, and so forth. You can use it as a combat skill when throwing things, though it doesn't qualify as a combat skill for other ends.
- **Fix (Untrained):** Create and repair devices both simple and complex. How complex will depend on your character's background; a lostworlder blacksmith is going to need some study time before he's ready to fix that broken fusion reactor, though he can do it eventually. Roll it to fix things, build things, and identify what something is supposed to do.
- **Heal (Untrained):** Employ medical and psychological treatment for the injured or disturbed. Roll it to cure diseases, stabilize the critically injured, treat psychological disorders, or diagnose illnesses.
- **Know (Untrained):** Know facts about academic or scientific fields. Roll it to understand planetary ecologies, remember relevant history, solve science mysteries, and know the basic facts about rare or esoteric topics.
- **Lead (Level 0):** Convince others to also do whatever it is you're trying to do. Talk might persuade them that following you is smart, but Lead can make them do it even when they think it's a bad idea. Roll it to lead troops in combat, convince others to follow you, or maintain morale and discipline.
- **Notice (Untrained):** Spot anomalies or interesting facts about your environment. Roll it for searching places, detecting ambushes, spotting things, and reading the emotional state of other people.
- **Perform (Untrained):** Exhibit some performative skill. Roll it to dance, sing, orate, act, or otherwise put on a convincing or emotionally moving performance.
- **Pilot (Level 1):** Use this skill to pilot vehicles or ride beasts. Roll it to fly spaceships, drive vehicles, ride animals, or tend to basic vehicle repair. This skill doesn't help you with things entirely outside the scope of your background or experience, though with some practice a PC can expand their expertise.
- **Program (Untrained):** Operating or hacking computing and communications hardware. Roll it to program or hack computers, control computer-operated hardware, operate communications tech, or decrypt things.
- **Punch (Untrained):** Use Punch as a combat skill when fighting unarmed. If your PC means to make a habit of this rather than as a recourse of desperation, you should take the Unarmed Fighter focus described later.
- **Shoot (Level 0):** Use Shoot as a combat skill when using ranged weaponry, whether hurled rocks, bows, laser pistols, combat rifles, or ship's gunnery.
- **Sneak (Untrained):** Move without drawing notice. Roll it for stealth, disguise, infiltration, manual legerdemain, pickpocketing, and the defeat of security measures.
- **Stab (Untrained):** Use Stab as a combat skill when wielding melee weapons, whether primitive or complex.
- **Survive (Untrained):** Obtain the basics of food, water, and shelter in hostile environments, along with avoiding their natural perils. Roll it to handle animals, navigate difficult terrain, scrounge urban resources, make basic tools, and avoid wild beasts or gangs.

- **Talk (Level 1):** Convince other people of the facts you want them to believe. What they do with that conviction may not be completely predictable. Roll it to persuade, charm, or deceive others in conversation.
- **Trade (Untrained):** Find what you need on the market and sell what you have. Roll it to sell or buy things, figure out where to purchase hard-to-get or illicit goods, deal with customs agents, or run a business.
- **Work (Untrained):** This is a catch-all skill for professions not represented by other skills. Roll it to work at a particular profession, art, or trade.

Notes
