

Norri

Class: Expert

Origin: Human

Homeworld: -

Goal: SnackOverflow has to deface the Citizens of Faultless Virtue (any bigotry / flat earthery / conspiracy) website

Level: 1

Background: Technician

Languages: Mandate

STR 7 -1

DEX 15 +1

CON 14 +1

INT 14 +1

WIS 10 +0

CHA 13 +0

HP 7

AC 14 vs TL3 weapons

AC 14 vs TL4+ melee weapons & firearms

Move 10m (Unencumbered)

Base Attack +0

System Strain max 14, permanent 0

Saving Throws:

Physical 14

Evasion 14

Mental 15

Attributes were rolled randomly (3d6 each, in order, set one to 14).

Class Abilities: Once per scene, you can reroll a failed skill check, taking the new roll if it's better.

Skills: Connect-0, Exert-0, Fix-0, Notice-0, Program-0, Shoot-0

Foci: Connected-1, Hacker-1

Equipment

- **Readied:** Backpack (TL 4), Dataslab, Laser Pistol, 2 x Line Shunt, Secure Clothing
- **Stowed:** Metatool, 2 x Power Cell (type A), 3 x Spare Parts, Toolkit (Postech)
- **Cached:** -
- **Credits:** \$50

Readied Items: 3 (Unencumbered: up to 3, Light Enc: up to 5, Heavy Enc.: up to 7)

Stowed Items: 6 (Unencumbered: up to 7, Light Enc: up to 11, Heavy Enc.: up to 15)

Armor

- **AC 14 vs low-tech (TL3 or lower) weapons:** Readied Secure Clothing gives base AC 13; Dexterity gives +1 AC
- **AC 14 vs high-tech (TL4 or higher) melee weapons and all firearms:** Readied Secure Clothing gives base AC 13; Dexterity gives +1 AC

Ranged Weapons

- **Laser Pistol:** +2 to hit, 1d6+1 dmg, rng 100/300, mag 10, ash or sand cloud applies up to a -4 to hit and halves range., TL 4, TL 4

Melee Weapons

- **Unarmed Attack:** -1 to hit, 1d2+1 dmg, Unarmed attacks always add the attacker's Punch skill to damage rolls, unlike other weapons., TL 0, TL 0

Foci

- **Connected:** You're remarkably gifted at making friends and forging ties with the people around you. Wherever you go, you always seem to know somebody useful to your ends.
 - **Level 1:** Gain Connect as a bonus skill. If you've spent at least a week in a not-entirely-hostile location, you'll have built a web of contacts willing to do favors for you that are no more than mildly illegal. You can call on one favor per game day and the GM decides how far they'll go for you.
- **Hacker:** You have a considerable fluency with digital security measures and standard encryption methods. You

know how to make computerized systems obey you until their automatic failsafes come down on your control.

- **Level 1:** Gain Program as a bonus skill. When attempting to hack a database or computerized system, roll 3d6 on the skill check and drop the lowest die.

Equipment Descriptions

- **Backpack (TL 4):** TL4 versions of this item are effectively without encumbrance, albeit they cost 50 credits. A worn backpack counts as a readied item, though objects stowed inside it still require the usual round to dig free. Characters without backpacks or similar carrying devices might have difficulty justifying the hauling of large amounts of gear. (enc. 0)
- **Dataslab:** A palm-sized computing device that can unfold into a thin slab roughly one-third of a meter on a side. It can perform all the functions of a compad or handheld computer and can communicate wirelessly with nearby devices. (enc. 1)
- **Laser Pistol:** Laser pistols are among the most common type of energy weapon, though pistols are considerably less energy-efficient than rifles. Depending on the tech used in the sector, they might produce silent, invisible beams of death or noisy, brightly-colored streaks of lethal light. The phased multifrequency beam is capable of penetrating any ordinary mist or haze, but a thick cloud of thermally-resistant particulate matter such as ash or sand can seriously degrade the beam, applying up to a -4 penalty to hit and cutting ranges in half. (enc. 1)
- **Line Shunt:** These palm-sized discs are roughly one centimeter in thickness, with an adhesive side that will stick to virtually anything and a polychromatic phased compound on its shell which will shift color to blend with its surroundings. One or more line shunts must be applied at specific locations within a site to access the more well-defended varieties of computerized systems. Shunts employ phased energy manipulation tech, and so do not need to be directly in contact with a data line but only within a few centimeters. Line shunts are single-use, and keep functioning until removed. (enc. -)
- **Metatool:** This wrist-mounted housing contains a myriad of small, useful tools designed to handle the widest possible range of technical needs. While a metatool is too limited to handle major jobs, it is usually sufficient to manage jury-rigged repairs and temporary fixes until the tech has time to apply a larger wrench to the problem. (enc. 1)
- **Power Cell, type A:** One of the few standardized artifacts inherited from before the Silence, power cells are small cylindrical objects designed to take and hold electrical charges. Type A cells are usually used for personal equipment, and the larger type B cells for vehicles and heavy gear. The engineering for the cells is substantially different, and they cannot be exchanged or recharge each other without a trained tech's modifications or a converter unit. Power cells can be recharged off a ship's power plant or other grid. Recharging requires 30 minutes for a type A cell. (enc. 1 for 3)
- **Secure Clothing:** Secure clothing comes in assorted styles and fashions ranging from casual street wear to haute couture. Normal fabrics and components are replaced with light, flexible armor components that are only slightly hindering to the wearer. Only close tactile examination can distinguish secure clothing from ordinary couture. (enc. 1)
- **Spare Parts:** This is a general category for a number of small TL4 components and repair materials. While a simple toolkit or metatool is often enough to fix a damaged object, severely broken devices may need replacement parts. Rather than keep a catalog of bits and pieces, a technician can simply bring along one or more units of spare parts, subtracting one whenever the GM decides that a repair effort requires more than existing salvage can support. A unit of spare parts can also be used to jury-rig some basic, uncomplicated tool or weapon from the equipment list with ten or fifteen minutes of assembly and at least Fix-0 skill. Such bodged devices rarely last longer than one scene. (enc. 1 for 3)
- **Toolkit (Postech):** Containing a wide range of necessary tools for a particular skill set, toolkits can handle almost any job that doesn't require a full-scale shop or lab. A standard postech toolkit can handle electronics, small welding jobs, and basic repair on ordinary TL4 goods. (enc. 3)
- **Unarmed Attack:** Unarmed attacks reflect ordinary kicks and punches. Unarmed attacks always add the attacker's Punch skill to damage rolls, unlike other weapons. Kinesis wraps, spiked knuckles, and other small fist weapons

may be treated as small advanced or primitive weapons that use the Punch skill and add the skill level to their rolled damage, but not to Shock. Such weapons do not augment a hero with the Unarmed Combatant focus. (enc. 0)

Skills

- **Connect (Level 0):** Find people who can be helpful to your purposes and get them to cooperate with you. Roll it to make useful connections with others, find people you know, know where to get illicit goods and services, and be familiar with foreign cultures and languages. You can use it in place of Talk for persuading people you find via this skill.
- **Exert (Level 0):** Apply trained speed, strength, or stamina in some feat of physical exertion. Roll it to run, jump, lift, swim, climb, throw, and so forth. You can use it as a combat skill when throwing things, though it doesn't qualify as a combat skill for other ends.
- **Fix (Level 0):** Create and repair devices both simple and complex. How complex will depend on your character's background; a lostworlder blacksmith is going to need some study time before he's ready to fix that broken fusion reactor, though he can do it eventually. Roll it to fix things, build things, and identify what something is supposed to do.
- **Notice (Level 0):** Spot anomalies or interesting facts about your environment. Roll it for searching places, detecting ambushes, spotting things, and reading the emotional state of other people.
- **Program (Level 0):** Operating or hacking computing and communications hardware. Roll it to program or hack computers, control computer-operated hardware, operate communications tech, or decrypt things.
- **Shoot (Level 0):** Use Shoot as a combat skill when using ranged weaponry, whether hurled rocks, bows, laser pistols, combat rifles, or ship's gunnery.
