

Opolly Moonshine

Class: Adventurer (Psychic/Warrior)

Origin: Human

Homeworld: -

Goal: -

Level: 1

Background: Vagabond

Languages: Mandate

STR 9 +0

DEX 9 +0

CON 14 +1

INT 14 +1

WIS 10 +0

CHA 13 +0

HP 9

AC 11 vs TL3 weapons

AC 11 vs TL4+ melee weapons & firearms

Move 10m (Unencumbered)

Base Attack +1

System Strain max 14, permanent 0

Saving Throws:

Physical 14

Evasion 14

Mental 15

Attributes were rolled randomly (3d6 each, in order, set one to 14). 3 rerolls

Class Abilities: Restricted Psychic disciplines and techniques, plus possess an Effort score.

Skills: Perform-0, Shoot-0, Sneak-0, Survive-0, Work-0

Foci: Psychic Training-1, Sniper-1

Psychic Disciplines & Techniques: Telekinesis-1 (Telekinetic Manipulation-1, Telekinetic Armory-1)

Effort: 4

Equipment

- **Readied:** Backpack (TL 0), Compad, Knife, Laser Rifle
- **Stowed:** Armored Vacc Suit, Binoculars (TL 3), Large Telekinetic Weapon, Medium Telekinetic Weapon, 8 x Power Cell (type A), Small Telekinetic Weapon, Survey Scanner, Survival Kit, Telekinetic Armor, Telekinetic Bolt
- **Cached:** -
- **Credits:** \$25

Readied Items: 4 (Unencumbered: up to 4, Light Enc: up to 6, Heavy Enc.: up to 8)

Stowed Items: 8 (Unencumbered: up to 9, Light Enc: up to 13, Heavy Enc.: up to 17)

Armor

- **AC 11 vs low-tech (TL3 or lower) weapons:** Unarmored base AC 10; Telekinesis skill level gives +1 AC
- **AC 11 vs high-tech (TL4 or higher) melee weapons and all firearms:** Unarmored base AC 10; Telekinesis skill level gives +1 AC

Ranged Weapons

- **Laser Rifle:** +2 to hit, 1d10 dmg, rng 300/500, mag 20, burst fire (uses 3 ammo, +4 to hit, 1d10+2 damage), ash or sand cloud applies up to a -4 to hit and halves range., TL 4, TL 4
- **Telekinetic Bolt:** +3 to hit, 1d10+3 dmg, rng 200/400, TL 4, TL 4

Melee Weapons

- **Knife:** -1 to hit, 1d4 dmg, Shock 1pts/AC15, TL 0, TL 0
- **Large Telekinetic Weapon:** +3 to hit, 1d10+2 dmg, Shock 3pts/AC15, TL 4, TL 4
- **Medium Telekinetic Weapon:** +3 to hit, 1d8+2 dmg, Shock 3pts/AC13, TL 4, TL 4
- **Small Telekinetic Weapon:** +3 to hit, 1d6+1 dmg, Shock 2pts/AC15, TL 4, TL 4
- **Unarmed Attack:** -1 to hit, 1d2 dmg, Unarmed attacks always add the attacker's Punch skill to damage rolls, unlike other weapons., TL 0, TL 0

Foci

- **Psychic Training:** You've had special training in a particular psychic discipline. You must be a Psychic or have taken the Partial Psychic class option as an Adventurer to pick this focus. In the latter case, you can only take training in the discipline you initially chose as a Partial Psychic. As with most foci, this focus can be taken only once.
- **Level 1:** Gain any psychic skill as a bonus. If this improves it to level-1 proficiency, choose a free level-1 technique from that discipline (in Psychic Disciplines below). Your maximum Effort increases by one.
- **Sniper:** You are an expert at placing a bullet or beam on an unsuspecting target. These special benefits only apply when making an Execution Attack with a firearm or bow, as described on page 52.
- **Level 1:** Gain Shoot as a bonus skill. When making a skill check for an Execution Attack or target shooting, roll 3d6 and drop the lowest die.

Psychic Disciplines & Techniques

- **Telekinesis-1:** Master the remote control of kinetic energy to move objects and fabricate force constructs.
Telekinetic abilities are something of a mixed blessing to those psychics who have them. While they are among the least feared and distrusted of psychic powers, they also produce effects that are not nearly so widely-demanded as biopsionic healing or metapsionic brainguarding. A telekinetic must be canny and creative to get the most from their abilities.
Telekinetic powers are strong but somewhat imprecise. The force they generate is usually invisible, though a psychic can allow a visible glow if desired, and the source of the telekinetic manipulation is not obvious to ordinary senses. Objects being held or worn by a mobile creature cannot normally be manipulated by telekinesis, nor can unwilling intelligent targets be directly manipulated. Machines, including non-sentient robots, can be affected as any other inanimate object, however. The psychic cannot use this discipline to lift their own person without special techniques.
Some techniques refer to a "physical attack" or "physical damage". This means a straightforward kinetic impact: bullets, punches, collisions, falls, compressions, or the like. Energy attacks are not included.
- **Core Technique - Telekinetic Manipulation:**
The adept may Commit Effort for the scene as a Main Action to direct telekinetic force toward an object or person within unaided visual range or with tactile contact with the psychic. This force isn't responsive enough to be effective as a weapon without further refinement of technique, and cannot cause damage to living or mobile targets. If used to crush or harm immobile unliving objects, it does 1d6 damage per skill level of the psychic per round of focus. Objects move at 20 meters per round when moved telekinetically.
A telekinetic force can be maintained over multiple rounds without expending further actions, such as holding a metal platform in place under a group of allies, but the psychic cannot again activate this technique on a second object until they release the first.
- **Level-0:** The psychic can exert force as if with one hand and their own strength.
- **Level-1:** The psychic can manipulate objects as if with both hands and can lift up to two hundred kilograms with this ability.
- **Other Techniques:**
 - **Telekinetic Armory-1:**
The adept may Commit Effort as an On Turn action to create both weapons and armor out of telekinetic force. These weapons are treated as tech level 4 and act as a rifle or any advanced melee weapon. Attack rolls can use either Dexterity, Wisdom, or Constitution modifiers, and may use the Telekinesis skill as the combat skill.
Armor may be created as part of this power, granting the psychic a base Armor Class equal to 15 plus their Telekinesis skill level. This armor does not stack with conventional armor, but Dexterity or shields modify it as usual. The gear continues to exist as long as the psychic chooses to leave the Effort committed, and they may be invisible or visible at the psychic's discretion.

Equipment Descriptions

- **Armored Vacc Suit:** An armored vacc suit has traded off some comfort and flexibility for additional protective thickness. Aside from functioning as a normal vacc suit, it has only half the usual chance to tear when hit by an edged weapon or suit ripper. The choice between armored or standard suits is a common debate in spacer bars. (enc. 2)
- **Backpack (TL 0):** A worn backpack counts as a readied item, though objects stowed inside it still require the usual round to dig free. Characters without backpacks or similar carrying devices might have difficulty justifying the hauling of large amounts of gear. (enc. 1)
- **Binoculars (TL 3):** Standard 7x50 binoculars. (enc. 1)
- **Compad:** One of a host of different hand-held portable communications devices. Most TL4 worlds have global comm coverage, but primitive worlds render these devices useless without a nearby comm server to provide connectivity. (enc. -)
- **Knife:** Small weapons are small one-handed implements no larger than a baton or knife. These weapons are easily concealed in normal clothing, and can even be kept Readied up sleeves or in tailored pockets. Many can be thrown at a range up to 10 meters. (enc. 1)
- **Large Telekinetic Weapon:** A psychic that has mastered the Telekinetic Armory discipline can produce blades or blasts of pure psychic energy that act like TL4 advanced melee weapons. These attacks may use the character's Telekinesis skill as the combat skill when using this attack. Large weapons resemble two-handed implements of bodily ruin such as claymores, halberds, tetsubos, or other such weapons. (enc. 0)
- **Laser Rifle:** Laser rifles are among the most common type of energy weapon. Depending on the tech used in the sector, they might produce silent, invisible beams of death or noisy, brightly-colored streaks of lethal light. The phased multifrequency beam is capable of penetrating any ordinary mist or haze, but a thick cloud of thermally-resistant particulate matter such as ash or sand can seriously degrade the beam, applying up to a -4 penalty to hit and cutting ranges in half. (enc. 2)
- **Medium Telekinetic Weapon:** A psychic that has mastered the Telekinetic Armory discipline can produce blades or blasts of pure psychic energy that act like TL4 advanced melee weapons. These attacks may use the character's Telekinesis skill as the combat skill when using this attack. Medium weapons resemble one-handed swords, axes, spears, or other obvious implements of war. (enc. 0)
- **Power Cell, type A:** One of the few standardized artifacts inherited from before the Silence, power cells are small cylindrical objects designed to take and hold electrical charges. Type A cells are usually used for personal equipment, and the larger type B cells for vehicles and heavy gear. The engineering for the cells is substantially different, and they cannot be exchanged or recharge each other without a trained tech's modifications or a converter unit. Power cells can be recharged off a ship's power plant or other grid. Recharging requires 30 minutes for a type A cell. (enc. 1 for 3)
- **Small Telekinetic Weapon:** A psychic that has mastered the Telekinetic Armory discipline can produce blades or blasts of pure psychic energy that act like TL4 advanced melee weapons. These attacks may use the character's Telekinesis skill as the combat skill when using this attack. Small weapons resemble small one-handed implements no larger than a baton or knife. (enc. 0)
- **Survey Scanner:** A multipurpose scanner that can take atmospheric and gravitic readings, provide basic chemical analysis of samples of up to one cubic centimeter in size, and record up to two hundred hours of video information or ten times that amount of audio. Know skill checks are necessary for any but the most basic analysis. (enc. 1)
- **Survival Kit:** A standard belt-worn kit with fire lighter, water filter, three thermal flares, knife, thermal blanket, a brightly-colored 3 x 3 meter waterproof tarp, a glowbug, and a radio beacon that can transmit a distress signal up to fifty kilometers for one month on the included type A power cell. Survival kits sold on a particular world will usually also include a small booklet on specific dangers or edible organics. Possession of a survival kit grants a +1 to all relevant Survive skill checks, assuming its contents are helpful on a given planet. Survival kits are well-organized, and count as only one item for encumbrance purposes. (enc. 1)

- **Telekinetic Armor:** A psychic that has mastered the Telekinetic Armory discipline can create armor made of pure telekinetic force. This protective field has a an AC of 15 plus their Telekinesis skill. (enc. 0)
- **Telekinetic Bolt:** A psychic that has mastered the Telekinetic Armory discipline can produce bolts of telekinetic energy that have the impact and range of a rifle, and are treated as TL4 weapons. These attacks may use the character's Telekinesis skill as the combat skill when using this attack. (enc. 0)
- **Unarmed Attack:** Unarmed attacks reflect ordinary kicks and punches. Unarmed attacks always add the attacker's Punch skill to damage rolls, unlike other weapons. Kinesis wraps, spiked knuckles, and other small fist weapons may be treated as small advanced or primitive weapons that use the Punch skill and add the skill level to their rolled damage, but not to Shock. Such weapons do not augment a hero with the Unarmed Combatant focus. (enc. 0)

Skills

- **Administer (Untrained):** Manage an organization, handle paperwork, analyze records, and keep an institution functioning on a daily basis. Roll it for bureaucratic expertise, organizational management, legal knowledge, dealing with government agencies, and understanding how institutions really work.
- **Connect (Untrained):** Find people who can be helpful to your purposes and get them to cooperate with you. Roll it to make useful connections with others, find people you know, know where to get illicit goods and services, and be familiar with foreign cultures and languages. You can use it in place of Talk for persuading people you find via this skill.
- **Exert (Untrained):** Apply trained speed, strength, or stamina in some feat of physical exertion. Roll it to run, jump, lift, swim, climb, throw, and so forth. You can use it as a combat skill when throwing things, though it doesn't qualify as a combat skill for other ends.
- **Fix (Untrained):** Create and repair devices both simple and complex. How complex will depend on your character's background; a lostworlder blacksmith is going to need some study time before he's ready to fix that broken fusion reactor, though he can do it eventually. Roll it to fix things, build things, and identify what something is supposed to do.
- **Heal (Untrained):** Employ medical and psychological treatment for the injured or disturbed. Roll it to cure diseases, stabilize the critically injured, treat psychological disorders, or diagnose illnesses.
- **Know (Untrained):** Know facts about academic or scientific fields. Roll it to understand planetary ecologies, remember relevant history, solve science mysteries, and know the basic facts about rare or esoteric topics.
- **Lead (Untrained):** Convince others to also do whatever it is you're trying to do. Talk might persuade them that following you is smart, but Lead can make them do it even when they think it's a bad idea. Roll it to lead troops in combat, convince others to follow you, or maintain morale and discipline.
- **Notice (Untrained):** Spot anomalies or interesting facts about your environment. Roll it for searching places, detecting ambushes, spotting things, and reading the emotional state of other people.
- **Perform (Level 0):** Exhibit some performative skill. Roll it to dance, sing, orate, act, or otherwise put on a convincing or emotionally moving performance.
- **Pilot (Untrained):** Use this skill to pilot vehicles or ride beasts. Roll it to fly spaceships, drive vehicles, ride animals, or tend to basic vehicle repair. This skill doesn't help you with things entirely outside the scope of your background or experience, though with some practice a PC can expand their expertise.
- **Program (Untrained):** Operating or hacking computing and communications hardware. Roll it to program or hack computers, control computer-operated hardware, operate communications tech, or decrypt things.
- **Punch (Untrained):** Use Punch as a combat skill when fighting unarmed. If your PC means to make a habit of this rather than as a recourse of desperation, you should take the Unarmed Fighter focus described later.
- **Shoot (Level 0):** Use Shoot as a combat skill when using ranged weaponry, whether hurled rocks, bows, laser pistols, combat rifles, or ship's gunnery.
- **Sneak (Level 0):** Move without drawing notice. Roll it for stealth, disguise, infiltration, manual legerdemain, pickpocketing, and the defeat of security measures.
- **Stab (Untrained):** Use Stab as a combat skill when wielding melee weapons, whether primitive or complex.

- **Survive (Level 0):** Obtain the basics of food, water, and shelter in hostile environments, along with avoiding their natural perils. Roll it to handle animals, navigate difficult terrain, scrounge urban resources, make basic tools, and avoid wild beasts or gangs.
- **Talk (Untrained):** Convince other people of the facts you want them to believe. What they do with that conviction may not be completely predictable. Roll it to persuade, charm, or deceive others in conversation.
- **Trade (Untrained):** Find what you need on the market and sell what you have. Roll it to sell or buy things, figure out where to purchase hard-to-get or illicit goods, deal with customs agents, or run a business.
- **Work (Level 0):** This is a catch-all skill for professions not represented by other skills. Roll it to work at a particular profession, art, or trade.

Notes
