

Elijah Abshire

Class: Psychic

Origin: Human

Homeworld: -

Goal: -

Level: 1

Background: Physician

Languages: Mandate

STR 14 +1

DEX 14 +1

CON 16 +1

INT 16 +1

WIS 14 +1

CHA 9 +0

HP 7

AC 14 vs TL3 weapons

AC 14 vs TL4+ melee weapons & firearms

Move 10m (Unencumbered)

Base Attack +0

System Strain max 16, permanent 0

Saving Throws:

Physical 14

Evasion 14

Mental 14

Attributes were rolled randomly (3d6 each, in order, set one to 14).

Class Abilities: Psychic disciplines and techniques, plus possess an Effort score.

Skills: Fix-0, Heal-1, Know-0

Foci: Psychic Training-1

Psychic Disciplines & Techniques: Biopsionics-0 (Psychic Succor-0), Telekinesis-1 (Telekinetic Manipulation-1, Pressure Field-1)

Effort: 4

Equipment

- **Readied:** Backpack (TL 0), Bioscanner, Compad, Laser Pistol, 4 x Lazarus Patch, 2 x Lift, Secure Clothing
- **Stowed:** Medkit
- **Cached:** -
- **Credits:** \$25

Readied Items: 6 (Unencumbered: up to 7, Light Enc: up to 9, Heavy Enc.: up to 11)

Stowed Items: 2 (Unencumbered: up to 14, Light Enc: up to 18, Heavy Enc.: up to 22)

Armor

- **AC 14 vs low-tech (TL3 or lower) weapons:** Readied Secure Clothing gives base AC 13; Dexterity gives +1 AC
- **AC 14 vs high-tech (TL4 or higher) melee weapons and all firearms:** Readied Secure Clothing gives base AC 13; Dexterity gives +1 AC

Ranged Weapons

- **Laser Pistol:** +0 to hit, 1d6+1 dmg, rng 100/300, mag 10, ash or sand cloud applies up to a -4 to hit and halves range., TL 4, TL 4

Melee Weapons

- **Unarmed Attack:** -1 to hit, 1d2+1 dmg, Unarmed attacks always add the attacker's Punch skill to damage rolls, unlike other weapons., TL 0, TL 0

Foci

- **Psychic Training:** You've had special training in a particular psychic discipline. You must be a Psychic or have taken the Partial Psychic class option as an Adventurer to pick this focus. In the latter case, you can only take training in the discipline you initially chose as a Partial Psychic. As with most foci, this focus can be taken only once.

- **Level 1:** Gain any psychic skill as a bonus. If this improves it to level-1 proficiency, choose a free level-1 technique from that discipline (in Psychic Disciplines below). Your maximum Effort increases by one.

Psychic Disciplines & Techniques

- **Biopsionics-0:** Master powers of physical repair, body augmentation, and shapeshifting.

Biopsionic powers repair, augment, debilitate, or damage living creatures. Unless otherwise specified the biopsionist must be able to touch a target, though clothing and armor do not interfere with the use of these abilities. Touching a willing or unsuspecting target is automatic, whereas touching a resisting target requires a normal Punch hit roll with a bonus equal to the practitioner's Biopsionics skill. Such touch effects do not inflict the normal damage of a Punch attack.

Unsurprisingly, biopsionic powers are among the most accepted psychic abilities. Even a modestly-experienced biopsion can perform miracles of healing for a community lucky enough to have their services.

System Strain:

Many curative biopsionic powers add to the target's System Strain. System Strain is a measure of the amount of system stress, intrusive modification, and general biological distress an organism might be suffering. Psionic healing, cybernetic implants, and powerful drugs all add to a target's System Strain.

If using a power or drug on a target would make their System Strain exceed their Constitution score, the effect fails to function; their body simply cannot adapt to the changes and cannot benefit from them.

System Strain decreases automatically by one point after each night of rest, provided the organism is wellfed and not compromised by sickness or privation.

- **Core Technique - Psychic Succor:**

The adept's touch stabilizes critically-wounded organisms. More sophisticated practitioners can heal tissue injuries, though curing diseases, detoxifying poisons, and fixing congenital deformities require additional techniques. Each use of Psychic Succor adds one point of System Strain to the target, or two points if they were mortally wounded at the time.

Activating Psychic Succor requires the biopsion to Commit Effort for the day. Once used, they can continue to use it for the rest of that scene without Committing Effort again.

- **Level-0:** The psychic's touch can automatically stabilize a mortally-wounded target as a Main Action. This power must be used on a target within six rounds of their collapse, and does not function on targets that have been decapitated or killed by Heavy weapons. It's the GM's decision as to whether a target is intact enough for this power to work.
- **Telekinesis-1:** Master the remote control of kinetic energy to move objects and fabricate force constructs.

Telekinetic abilities are something of a mixed blessing to those psychics who have them. While they are among the least feared and distrusted of psychic powers, they also produce effects that are not nearly so widely-demanded as biopsionic healing or metapsionic brainguarding. A telekinetic must be canny and creative to get the most from their abilities.

Telekinetic powers are strong but somewhat imprecise. The force they generate is usually invisible, though a psychic can allow a visible glow if desired, and the source of the telekinetic manipulation is not obvious to ordinary senses. Objects being held or worn by a mobile creature cannot normally be manipulated by telekinesis, nor can unwilling intelligent targets be directly manipulated. Machines, including non-sentient robots, can be affected as any other inanimate object, however. The psychic cannot use this discipline to lift their own person without special techniques.

Some techniques refer to a "physical attack" or "physical damage". This means a straightforward kinetic impact: bullets, punches, collisions, falls, compressions, or the like. Energy attacks are not included.
- **Core Technique - Telekinetic Manipulation:**

The adept may Commit Effort for the scene as a Main Action to direct telekinetic force toward an object or person within unaided visual range or with tactile contact with the psychic. This force isn't responsive enough to be effective as a weapon without further refinement of technique, and cannot cause damage to living or

mobile targets. If used to crush or harm immobile unliving objects, it does 1d6 damage per skill level of the psychic per round of focus. Objects move at 20 meters per round when moved telekinetically.

A telekinetic force can be maintained over multiple rounds without expending further actions, such as holding a metal platform in place under a group of allies, but the psychic cannot again activate this technique on a second object until they release the first.

- **Level-0:** The psychic can exert force as if with one hand and their own strength.
- **Level-1:** The psychic can manipulate objects as if with both hands and can lift up to two hundred kilograms with this ability.
- **Other Techniques:**
 - **Pressure Field-1:**

As an Instant action, the adept can manifest a protective force skin around their person equivalent to a vacc suit, maintaining pressure and temperature even in hard vacuum conditions. They can ignore temperatures at a range of plus or minus 100 degrees Celsius and automatically pressurize thin atmospheres for breathability, or filter particulates or airborne toxins. By Committing Effort for the scene, they can shield up to six comrades. This lasts until the user reclaims the Effort.

Equipment Descriptions

- **Backpack (TL 0):** A worn backpack counts as a readied item, though objects stowed inside it still require the usual round to dig free. Characters without backpacks or similar carrying devices might have difficulty justifying the hauling of large amounts of gear. (enc. 1)
- **Bioscanner:** While an untrained user can use this tool to discern internal bleeding, gross physical distress, or toxins in a plant or animal, it requires Heal-0 skill to use this tool to its fullest. Such operators can use the bioscanner for a full spectrum of diagnosis and DNA sequencing achievable in minutes. One type A power cell will power it for up to twenty-four hours of regular usage. (enc. 1)
- **Compad:** One of a host of different hand-held portable communications devices. Most TL4 worlds have global comm coverage, but primitive worlds render these devices useless without a nearby comm server to provide connectivity. (enc. -)
- **Laser Pistol:** Laser pistols are among the most common type of energy weapon, though pistols are considerably less energy-efficient than rifles. Depending on the tech used in the sector, they might produce silent, invisible beams of death or noisy, brightly-colored streaks of lethal light. The phased multifrequency beam is capable of penetrating any ordinary mist or haze, but a thick cloud of thermally-resistant particulate matter such as ash or sand can seriously degrade the beam, applying up to a -4 penalty to hit and cutting ranges in half. (enc. 1)
- **Lazarus Patch:** A vital tool for adventurers, the Lazarus patch is a heavy compress laced with antibiotics, coagulants, system stabilizers, plasma, and a oneshot diagnostic suite. If the patch is applied to a character that has fallen to 0 hit points, the user can make an Int/Heal or Dex/Heal skill check against difficulty 6 to stabilize the subject. The more time between injury and application, the less chance the patch has to work. Each round after the first, an additional -1 penalty is applied to the skill check. The patch is no use after six rounds. If the medic fails the first skill check, they can keep trying the check once per round until the victim is revived or time runs out. Lazarus patches are no use on victims that have died of disease, poison, or have been mangled beyond surgical repair by Heavy weapons or similar trauma. Only one patch can be applied to a victim. Revived victims are critically wounded until sufficient medical help has been tendered; see the Systems chapter for details. (enc. 1 for 3)
- **Lift: (Heal-0):** A Lift stim augments and amplifies the body's natural response to physical injury and exhaustion. This boost speeds natural recovery drastically and heals 1d8 plus the user's Heal skill in hit points after five minutes of rest. Lift stims do not work on PCs who are mortally wounded; they need to be stabilized before the Lift can help them, though application to a stabilized target will get them back on their feet and active again. Each application adds 1 System Strain to the target. Each additional application of Lift to a target the same day increases the minimum Heal skill needed by 1. (enc. -)

- **Medkit:** Containing a broad supply of pharmaceuticals, spray bandages, glue sutures, and a succinct handbook of injury care, the medkit is designed for handling sudden and drastic injuries. It also contains all the necessary tools for providing long-term recuperative care for critically injured characters. After each day of granting long-term recuperative care, roll 2d6 per patient treated; on a 12, the kit has run out of some vital pharmaceutical and has become useless. (enc. 2)
- **Secure Clothing:** Secure clothing comes in assorted styles and fashions ranging from casual street wear to haute couture. Normal fabrics and components are replaced with light, flexible armor components that are only slightly hindering to the wearer. Only close tactile examination can distinguish secure clothing from ordinary couture. (enc. 1)
- **Unarmed Attack:** Unarmed attacks reflect ordinary kicks and punches. Unarmed attacks always add the attacker's Punch skill to damage rolls, unlike other weapons. Kinesis wraps, spiked knuckles, and other small fist weapons may be treated as small advanced or primitive weapons that use the Punch skill and add the skill level to their rolled damage, but not to Shock. Such weapons do not augment a hero with the Unarmed Combatant focus. (enc. 0)

Skills

- **Fix (Level 0):** Create and repair devices both simple and complex. How complex will depend on your character's background; a lostworlder blacksmith is going to need some study time before he's ready to fix that broken fusion reactor, though he can do it eventually. Roll it to fix things, build things, and identify what something is supposed to do.
- **Heal (Level 1):** Employ medical and psychological treatment for the injured or disturbed. Roll it to cure diseases, stabilize the critically injured, treat psychological disorders, or diagnose illnesses.
- **Know (Level 0):** Know facts about academic or scientific fields. Roll it to understand planetary ecologies, remember relevant history, solve science mysteries, and know the basic facts about rare or esoteric topics.
