

Alex Watts

Class: Expert

Origin: VI Android

Homeworld: Unknown

Goal: Explore, acquire knowledge, discovery self-origin.

Level: 3

Background: Pilot

Languages: Mandate

STR 11 +0

DEX 12 +0

CON 10 +0

INT 14 +1

WIS 9 +0

CHA 7 -1

HP 13 (1 reroll)

AC 13 vs TL3 weapons

AC 13 vs TL4+ melee weapons & firearms

Move 10m (Unencumbered)

Base Attack +1

System Strain max 10, permanent 0

Saving Throws:

Physical 13

Evasion 12

Mental 13

Attributes were assigned from a standard array.

Class Abilities: Once per scene, you can reroll a failed skill check, taking the new roll if it's better.

Skills: Expert-0, Fix-0, Heal-0, Know-0, Notice-0, Pilot-0, Program-2, Shoot-1

Foci: Hacker-1, Specialist (Fix)-1, VI - Android-1

Virtual Intelligence: Base AC 10. Do not eat, sleep or drink. Require one Type B cell per week. Immune to vacuum, disease and poison. Do not heal naturally and are unaffected by biopsionic healing. Can be healed with a unit of spare parts and Fix-1 skill, restoring hit points equal to the VI's level. Becomes incapacitated and Badly Damaged at zero hit points. Badly Damaged can be removed with 24 hours work and a unit of spare parts. A Badly Damaged VI can be healed as usual with spare parts, but if reduced to zero hit points again must make a Physical save or be destroyed.

Equipment

- **Readied:** Armored Undersuit, Dataslab, Laser Pistol, Rifle, Stun Baton
- **Stowed:** Backpack (TL 0), Metatool, Monoblade Knife, 4 x Power Cell (type A), 6 x Spare Parts, Toolkit (Postech)
- **Cached:** -
- **Credits:** \$75

Readied Items: 5 (Unencumbered: up to 5, Light Enc: up to 7, Heavy Enc.: up to 9)

Stowed Items: 10 (Unencumbered: up to 11, Light Enc: up to 15, Heavy Enc.: up to 19)

Armor

- **AC 13 vs low-tech (TL3 or lower) weapons:** Readied Armored Undersuit gives base AC 13
- **AC 13 vs high-tech (TL4 or higher) melee weapons and all firearms:** Readied Armored Undersuit gives base AC 13

Ranged Weapons

- **Laser Pistol:** +3 to hit, 1d6 dmg, rng 100/300, mag 10, ash or sand cloud applies up to a -4 to hit and halves range., TL 4, TL 4
- **Rifle:** +2 to hit, 1d10+2 dmg, rng 200/400, mag 6, TL 2, TL 2

Melee Weapons

- **Monoblade Knife:** -1 to hit, 1d6 dmg, Shock 1pts/AC15, TL 4, TL 4
- **Stun Baton:** -1 to hit, 1d8 dmg, Shock 1pts/AC15, Can drop target to 0 hp but will not kill, TL 4, TL 4
- **Unarmed Attack:** -1 to hit, 1d2 dmg, Unarmed attacks always add the attacker's Punch skill to damage rolls, unlike other weapons., TL 0, TL 0

Foci

- **Hacker:** You have a considerable fluency with digital security measures and standard encryption methods. You know how to make computerized systems obey you until their automatic failsafes come down on your control.
 - **Level 1:** Gain Program as a bonus skill. When attempting to hack a database or computerized system, roll 3d6 on the skill check and drop the lowest die.
- **Specialist (Fix):** You are remarkably talented at a particular skill. Whether a marvelous cat burglar, a world-famous athlete, a brilliant engineer, or some other savant, your expertise is extremely reliable. You may take this focus more than once for different skills.
 - **Level 1:** Gain a non-combat, non-psychic skill as a bonus. Roll 3d6 and drop the lowest die for all skill checks in this skill.
- **VI - Android:** You were built as an android, a robot indistinguishable from a human without a medical-grade inspection. Most androids are “companion” bots, though other VIs with roles that involve significant human interaction may also be built as androids. Minor scuffs and cuts don’t reveal your robotic nature, but if reduced to zero hit points, your unnatural innards are obvious. All VI PCs have the same attributes, hit points, abilities, and character classes as humans do, but normal VIs cannot be Psychics nor take the Partial Psychic class option for Adventurers. They are created the same way as any other human PC and start out at first level. While they may have been built to be a particular type of bot, they use their own statistics, and not those for their type on page 197. VIs that are not wearing armor normally have Armor Class 10, just as humans do. VIs need neither sleep, eat, nor drink, requiring one Type B cell per week of operation away from readily-available current. They are immune to vacuum but suffer degradation from radiation as humans do. They cannot be poisoned or diseased by normal forms of toxin. They can be reprogrammed, altering or erasing their personality and behavioral limits, but such mental remodeling takes at least an undisturbed month to execute by someone with at least Program-1 skill. Most VIs will fight to their destruction to avoid such a fate. VIs can be healed with spare parts and the work of someone with Fix-0 skill. VIs can always repair themselves, even without the requisite skill. Each unit of spare parts heals lost hit points equal to the VI’s character level and takes fifteen minutes to apply. VIs cannot normally be affected by biopsionic healing effects. VIs reduced to zero hit points but not entirely smashed are incapacitated and Badly Damaged. Removing this quality requires 24 hours of work by a technician and at least one unit of spare parts, after which damage can be repaired as normal. As a field expedient, a tech can jury-rig a Badly Damaged VI in the field, healing it with spare parts at the normal rate and speed. If such a bot is reduced to zero hit points again while Badly Damaged, however, it must make a Physical save or be permanently destroyed. VIs are intimately connected to their specific hardware, and cannot be transplanted into new forms. Cosmetic alterations can be made, however, and equipment can be grafted into the VI’s chassis. Such built-in equipment costs twice as much as a stand-alone component and takes a week to properly integrate into the VI’s system. A VI can have a total number of encumbrance points worth of additional gear grafted onto it equal to half its Constitution score, rounded down. Such gear may require its own separate power source or ammunition supply. VIs cannot make use of cyberware.
 - **Level 1:** You are an Android. Gain a bonus skill related to your intended function. You have all the usual traits and abilities of a VI robot.

Equipment Descriptions

- **Armored Undersuit:** An armored undersuit is a skin-tight bodysuit woven of advanced TL4 fibers with exceptional shock-activated rigidity and impact dispersion capabilities. Transparent panels allow for it to be worn with almost any outfit without drawing notice or being detected without a close tactile examination. (enc. 0)
- **Backpack (TL 0):** A worn backpack counts as a readied item, though objects stowed inside it still require the usual round to dig free. Characters without backpacks or similar carrying devices might have difficulty justifying the hauling of large amounts of gear. (enc. 1)
- **Dataslab:** A palm-sized computing device that can unfold into a thin slab roughly one-third of a meter on a side. It can perform all the functions of a compad or handheld computer and can communicate wirelessly with nearby devices. (enc. 1)
- **Laser Pistol:** Laser pistols are among the most common type of energy weapon, though pistols are considerably

less energy-efficient than rifles. Depending on the tech used in the sector, they might produce silent, invisible beams of death or noisy, brightly-colored streaks of lethal light. The phased multifrequency beam is capable of penetrating any ordinary mist or haze, but a thick cloud of thermally-resistant particulate matter such as ash or sand can seriously degrade the beam, applying up to a -4 penalty to hit and cutting ranges in half. (enc. 1)

- **Metatool:** This wrist-mounted housing contains a myriad of small, useful tools designed to handle the widest possible range of technical needs. While a metatool is too limited to handle major jobs, it is usually sufficient to manage jury-rigged repairs and temporary fixes until the tech has time to apply a larger wrench to the problem. (enc. 1)
- **Monoblade Knife:** Small weapons are small one-handed implements no larger than a baton or knife. These weapons are easily concealed in normal clothing, and can even be kept Readied up sleeves or in tailored pockets. Many can be thrown at a range up to 10 meters. (enc. 1)
- **Power Cell, type A:** One of the few standardized artifacts inherited from before the Silence, power cells are small cylindrical objects designed to take and hold electrical charges. Type A cells are usually used for personal equipment, and the larger type B cells for vehicles and heavy gear. The engineering for the cells is substantially different, and they cannot be exchanged or recharge each other without a trained tech's modifications or a converter unit. Power cells can be recharged off a ship's power plant or other grid. Recharging requires 30 minutes for a type A cell. (enc. 1 for 3)
- **Rifle:** Rifles are the mainstays of most TL2 armies and hunters, thanks to their superior range and power. (enc. 2)
- **Spare Parts:** This is a general category for a number of small TL4 components and repair materials. While a simple toolkit or metatool is often enough to fix a damaged object, severely broken devices may need replacement parts. Rather than keep a catalog of bits and pieces, a technician can simply bring along one or more units of spare parts, subtracting one whenever the GM decides that a repair effort requires more than existing salvage can support. A unit of spare parts can also be used to jury-rig some basic, uncomplicated tool or weapon from the equipment list with ten or fifteen minutes of assembly and at least Fix-0 skill. Such bodged devices rarely last longer than one scene. (enc. 1 for 3)
- **Stun Baton:** Stun batons are common law enforcement tools. The damage they do can drop a target to zero hit points, but will not kill them, the victim awakening in ten minutes with one hit point. Stun batons trickle-charge from normal movement and will not run out of electrical energy under normal use conditions. (enc. 1)
- **Toolkit (Postech):** Containing a wide range of necessary tools for a particular skill set, toolkits can handle almost any job that doesn't require a full-scale shop or lab. A standard postech toolkit can handle electronics, small welding jobs, and basic repair on ordinary TL4 goods. (enc. 3)
- **Unarmed Attack:** Unarmed attacks reflect ordinary kicks and punches. Unarmed attacks always add the attacker's Punch skill to damage rolls, unlike other weapons. Kinesis wraps, spiked knuckles, and other small fist weapons may be treated as small advanced or primitive weapons that use the Punch skill and add the skill level to their rolled damage, but not to Shock. Such weapons do not augment a hero with the Unarmed Combatant focus. (enc. 0)

Skills

- **Administer (Untrained):** Manage an organization, handle paperwork, analyze records, and keep an institution functioning on a daily basis. Roll it for bureaucratic expertise, organizational management, legal knowledge, dealing with government agencies, and understanding how institutions really work.
- **Connect (Untrained):** Find people who can be helpful to your purposes and get them to cooperate with you. Roll it to make useful connections with others, find people you know, know where to get illicit goods and services, and be familiar with foreign cultures and languages. You can use it in place of Talk for persuading people you find via this skill.
- **Exert (Level 0):** Apply trained speed, strength, or stamina in some feat of physical exertion. Roll it to run, jump, lift, swim, climb, throw, and so forth. You can use it as a combat skill when throwing things, though it doesn't qualify as a combat skill for other ends.
- **Fix (Level 0):** Create and repair devices both simple and complex. How complex will depend on your character's

background; a lostworlder blacksmith is going to need some study time before he's ready to fix that broken fusion reactor, though he can do it eventually. Roll it to fix things, build things, and identify what something is supposed to do.

- **Heal (Level 0):** Employ medical and psychological treatment for the injured or disturbed. Roll it to cure diseases, stabilize the critically injured, treat psychological disorders, or diagnose illnesses.
- **Know (Level 0):** Know facts about academic or scientific fields. Roll it to understand planetary ecologies, remember relevant history, solve science mysteries, and know the basic facts about rare or esoteric topics.
- **Lead (Untrained):** Convince others to also do whatever it is you're trying to do. Talk might persuade them that following you is smart, but Lead can make them do it even when they think it's a bad idea. Roll it to lead troops in combat, convince others to follow you, or maintain morale and discipline.
- **Notice (Level 0):** Spot anomalies or interesting facts about your environment. Roll it for searching places, detecting ambushes, spotting things, and reading the emotional state of other people.
- **Perform (Untrained):** Exhibit some performative skill. Roll it to dance, sing, orate, act, or otherwise put on a convincing or emotionally moving performance.
- **Pilot (Level 0):** Use this skill to pilot vehicles or ride beasts. Roll it to fly spaceships, drive vehicles, ride animals, or tend to basic vehicle repair. This skill doesn't help you with things entirely outside the scope of your background or experience, though with some practice a PC can expand their expertise.
- **Program (Level 2):** Operating or hacking computing and communications hardware. Roll it to program or hack computers, control computer-operated hardware, operate communications tech, or decrypt things.
- **Punch (Untrained):** Use Punch as a combat skill when fighting unarmed. If your PC means to make a habit of this rather than as a recourse of desperation, you should take the Unarmed Fighter focus described later.
- **Shoot (Level 1):** Use Shoot as a combat skill when using ranged weaponry, whether hurled rocks, bows, laser pistols, combat rifles, or ship's gunnery.
- **Sneak (Untrained):** Move without drawing notice. Roll it for stealth, disguise, infiltration, manual legerdemain, pickpocketing, and the defeat of security measures.
- **Stab (Untrained):** Use Stab as a combat skill when wielding melee weapons, whether primitive or complex.
- **Survive (Untrained):** Obtain the basics of food, water, and shelter in hostile environments, along with avoiding their natural perils. Roll it to handle animals, navigate difficult terrain, scrounge urban resources, make basic tools, and avoid wild beasts or gangs.
- **Talk (Untrained):** Convince other people of the facts you want them to believe. What they do with that conviction may not be completely predictable. Roll it to persuade, charm, or deceive others in conversation.
- **Trade (Untrained):** Find what you need on the market and sell what you have. Roll it to sell or buy things, figure out where to purchase hard-to-get or illicit goods, deal with customs agents, or run a business.
- **Work (Untrained):** This is a catch-all skill for professions not represented by other skills. Roll it to work at a particular profession, art, or trade.

Notes

Alex Watts is great with technology and is generally knowledgeable, but has amnesia when it comes to his own background. He came to on a broken down ship, drifting in a debris field, not knowing where he came from or who created him. He began scavenging parts, fixing, rebuilding, and reselling things in order to get by. His long term goal is to acquire knowledge through exploration, hoping to eventually figure out who created him and why his memory has been wiped.

He is lawfully good, perceiving lawfulness as synonymous with ethically good. However, he is naive, expecting everyone to be doing the right thing all of the time, and lacks the intuition to pick up on subtle cues that those around him might be up to something nefarious.
