

Lieutenant Corporal James Harewood

Class: Expert

Origin: Human

Homeworld: Mom's Spaghetti

Goal: Find who took my legs

Level: 3

Background: Soldier

Languages: Mandate

STR 14 +1

DEX 14 +1

CON 14 +1

INT 10 +0

WIS 8 +0

CHA 8 +0

HP 19 (5 rerolls)

AC 17 vs TL3 weapons

AC 16 vs TL4+ melee weapons & firearms

Move 7m (Lightly Encumbered)

Base Attack +1

System Strain max 14, permanent 0

Saving Throws:

Physical 12

Evasion 12

Mental 13

Non-standard method: Attributes were rolled randomly (3d6 each, assign order, set one to 14). 1 reroll

Class Abilities: Once per scene, you can reroll a failed skill check, taking the new roll if it's better.

Skills: Exert-0, Heal-1, Notice-0, Shoot-1, Stab-1, Survive-0

Foci: Close Combatant-2, Specialist (Heal)-1

Equipment

- **Readied:** Ammo (20 rounds), Combat Rifle, Compad, Knife, Laser Pistol, Shield, Woven Body Armor
- **Stowed:** 2 x Ammo (20 rounds), 2 x Ammo (20 rounds), Backpack (TL 0), 3 x Lift, Medkit, Tailored Antiallergens
- **Cached:** -
- **Credits:** \$25

Readied Items: 9 (Unencumbered: up to 7, Light Enc: up to 9, Heavy Enc.: up to 11)

Stowed Items: 5 (Unencumbered: up to 14, Light Enc: up to 18, Heavy Enc.: up to 22)

Armor

- **AC 17 vs low-tech (TL3 or lower) weapons:** Readied Woven Body Armor gives base AC 15; Readied Shield gives +1 AC; Dexterity gives +1 AC
- **AC 16 vs high-tech (TL4 or higher) melee weapons and all firearms:** Readied Woven Body Armor gives base AC 15; Dexterity gives +1 AC; Primitive armor (Shield) does not protect against TL4+ melee weapons and all firearms

Ranged Weapons

- **Combat Rifle:** +3 to hit, 1d12+1 dmg, rng 100/300, mag 30, burst fire (uses 3 ammo, +5 to hit, 1d12+3 damage), TL 3
- **Laser Pistol:** +4 to hit, 1d6+1 dmg, rng 100/300, mag 10, ash or sand cloud applies up to a -4 to hit and halves range., TL 4

Melee Weapons

- **Knife:** +3 to hit, 1d4+1 dmg, Shock 2pts/AC10, TL 0
- **Unarmed Attack:** +0 to hit, 1d2+1 dmg, Unarmed attacks always add the attacker's Punch skill to damage rolls, unlike other weapons., TL 0

Foci

- **Close Combatant:** You've had all too much practice at close-in fighting and desperate struggles with pistol or blade. You're extremely skilled at avoiding injury in melee combat, and at level 2 you can dodge through a melee scrum without fear of being knifed in passing.

- **Level 1:** Gain any combat skill as a bonus skill. You can use pistol-sized ranged weapons in melee without suffering penalties for the proximity of melee attackers. You ignore Shock damage from melee assailants, even if you're unarmored at the time.
- **Level 2:** The Shock damage from your melee attacks treats all targets as if they were AC 10. The Fighting Withdrawal combat action is treated as an On Turn action for you and can be performed freely.
- **Specialist (Heal):** You are remarkably talented at a particular skill. Whether a marvelous cat burglar, a world-famous athlete, a brilliant engineer, or some other savant, your expertise is extremely reliable. You may take this focus more than once for different skills.
- **Level 1:** Gain a non-combat, non-psychic skill as a bonus. Roll 3d6 and drop the lowest die for all skill checks in this skill.

Equipment Descriptions

- **Ammo, 20 rounds:** A few worlds are too primitive or too resource-poor to manufacture ammunition, but the vast majority of worlds provide cartridges in almost every conceivable caliber and make. Most local gunsmiths can load ammunition to any specification required by a buyer. (enc. 1 for 3)
- **Ammo, 20 rounds:** A few worlds are too primitive or too resource-poor to manufacture ammunition, but the vast majority of worlds provide cartridges in almost every conceivable caliber and make. Most local gunsmiths can load ammunition to any specification required by a buyer. (enc. 1 for 3)
- **Backpack (TL 0):** A worn backpack counts as a readied item, though objects stowed inside it still require the usual round to dig free. Characters without backpacks or similar carrying devices might have difficulty justifying the hauling of large amounts of gear. (enc. 1)
- **Combat Rifle:** Combat rifles are favored by the militaries of tech level 3 worlds, trading some of the often-unnecessary range and penetration of a conventional rifle for a larger ammunition capacity and burst fire capabilities. On more strait-laced worlds such military weaponry is often illegal for civilians to possess. (enc. 2)
- **Compad:** One of a host of different hand-held portable communications devices. Most TL4 worlds have global comm coverage, but primitive worlds render these devices useless without a nearby comm server to provide connectivity. (enc. -)
- **Knife:** Small weapons are small one-handed implements no larger than a baton or knife. These weapons are easily concealed in normal clothing, and can even be kept Readied up sleeves or in tailored pockets. Many can be thrown at a range up to 10 meters. (enc. 1)
- **Laser Pistol:** Laser pistols are among the most common type of energy weapon, though pistols are considerably less energy-efficient than rifles. Depending on the tech used in the sector, they might produce silent, invisible beams of death or noisy, brightly-colored streaks of lethal light. The phased multifrequency beam is capable of penetrating any ordinary mist or haze, but a thick cloud of thermally-resistant particulate matter such as ash or sand can seriously degrade the beam, applying up to a -4 penalty to hit and cutting ranges in half. (enc. 1)
- **Lift: (Heal-0):** A Lift stim augments and amplifies the body's natural response to physical injury and exhaustion. This boost speeds natural recovery drastically and heals 1d8 plus the user's Heal skill in hit points after five minutes of rest. Lift stims do not work on PCs who are mortally wounded; they need to be stabilized before the Lift can help them, though application to a stabilized target will get them back on their feet and active again. Each application adds 1 System Strain to the target. Each additional application of Lift to a target the same day increases the minimum Heal skill needed by 1. (enc. -)
- **Medkit:** Containing a broad supply of pharmaceuticals, spray bandages, glue sutures, and a succinct handbook of injury care, the medkit is designed for handling sudden and drastic injuries. It also contains all the necessary tools for providing long-term recuperative care for critically injured characters. After each day of granting long-term recuperative care, roll 2d6 per patient treated; on a 12, the kit has run out of some vital pharmaceutical and has become useless. (enc. 2)
- **Shield:** Shields are an ancient yet extremely useful adjunct to body armor. Primitive shields are usually of wood or stretched hide, while more modern riot shields tend toward clear plastic. All shields require one free hand to use effectively. Aside from their AC benefit, a shield also renders the bearer immune to the first instance of melee

Shock damage they take each round, assuming the shield is effective against the weapon being used. A shield grants as base AC of 13; if the users already has AC 13, it grants +1 AC. (enc. 2)

- **Tailored Antiallergens:** A dose of tailored antiallergens can be used to render a local world's organics largely edible by humans and its atmosphere breathable without severe allergic reactions. While many worlds have been seeded with Terran life forms or have produced organics that are edible by humans, others are toxic without the appropriate chemical augmentation. A dose of these antiallergens lasts for twenty-four hours. (enc. -)
- **Unarmed Attack:** Unarmed attacks reflect ordinary kicks and punches. Unarmed attacks always add the attacker's Punch skill to damage rolls, unlike other weapons. Kinesis wraps, spiked knuckles, and other small fist weapons may be treated as small advanced or primitive weapons that use the Punch skill and add the skill level to their rolled damage, but not to Shock. Such weapons do not augment a hero with the Unarmed Combatant focus. (enc. 0)
- **Woven Body Armor:** Woven body armor represents the best armor that a TL3 world can manufacture, or an up-armored version of security armor used by TL4 high-threat response teams. The design is significantly more cumbersome, but allows for multiple layers of protection. (enc. 2)

Skills

- **Administer (Untrained):** Manage an organization, handle paperwork, analyze records, and keep an institution functioning on a daily basis. Roll it for bureaucratic expertise, organizational management, legal knowledge, dealing with government agencies, and understanding how institutions really work.
- **Connect (Untrained):** Find people who can be helpful to your purposes and get them to cooperate with you. Roll it to make useful connections with others, find people you know, know where to get illicit goods and services, and be familiar with foreign cultures and languages. You can use it in place of Talk for persuading people you find via this skill.
- **Exert (Level 0):** Apply trained speed, strength, or stamina in some feat of physical exertion. Roll it to run, jump, lift, swim, climb, throw, and so forth. You can use it as a combat skill when throwing things, though it doesn't qualify as a combat skill for other ends.
- **Fix (Untrained):** Create and repair devices both simple and complex. How complex will depend on your character's background; a lostworlder blacksmith is going to need some study time before he's ready to fix that broken fusion reactor, though he can do it eventually. Roll it to fix things, build things, and identify what something is supposed to do.
- **Heal (Level 1):** Employ medical and psychological treatment for the injured or disturbed. Roll it to cure diseases, stabilize the critically injured, treat psychological disorders, or diagnose illnesses.
- **Know (Untrained):** Know facts about academic or scientific fields. Roll it to understand planetary ecologies, remember relevant history, solve science mysteries, and know the basic facts about rare or esoteric topics.
- **Lead (Untrained):** Convince others to also do whatever it is you're trying to do. Talk might persuade them that following you is smart, but Lead can make them do it even when they think it's a bad idea. Roll it to lead troops in combat, convince others to follow you, or maintain morale and discipline.
- **Notice (Level 0):** Spot anomalies or interesting facts about your environment. Roll it for searching places, detecting ambushes, spotting things, and reading the emotional state of other people.
- **Perform (Untrained):** Exhibit some performative skill. Roll it to dance, sing, orate, act, or otherwise put on a convincing or emotionally moving performance.
- **Pilot (Untrained):** Use this skill to pilot vehicles or ride beasts. Roll it to fly spaceships, drive vehicles, ride animals, or tend to basic vehicle repair. This skill doesn't help you with things entirely outside the scope of your background or experience, though with some practice a PC can expand their expertise.
- **Program (Untrained):** Operating or hacking computing and communications hardware. Roll it to program or hack computers, control computer-operated hardware, operate communications tech, or decrypt things.
- **Punch (Untrained):** Use Punch as a combat skill when fighting unarmed. If your PC means to make a habit of this rather than as a recourse of desperation, you should take the Unarmed Fighter focus described later.
- **Shoot (Level 1):** Use Shoot as a combat skill when using ranged weaponry, whether hurled rocks, bows, laser

pistols, combat rifles, or ship's gunnery.

- **Sneak (Untrained):** Move without drawing notice. Roll it for stealth, disguise, infiltration, manual legerdemain, pickpocketing, and the defeat of security measures.
- **Stab (Level 1):** Use Stab as a combat skill when wielding melee weapons, whether primitive or complex.
- **Survive (Level 0):** Obtain the basics of food, water, and shelter in hostile environments, along with avoiding their natural perils. Roll it to handle animals, navigate difficult terrain, scrounge urban resources, make basic tools, and avoid wild beasts or gangs.
- **Talk (Untrained):** Convince other people of the facts you want them to believe. What they do with that conviction may not be completely predictable. Roll it to persuade, charm, or deceive others in conversation.
- **Trade (Untrained):** Find what you need on the market and sell what you have. Roll it to sell or buy things, figure out where to purchase hard-to-get or illicit goods, deal with customs agents, or run a business.
- **Work (Untrained):** This is a catch-all skill for professions not represented by other skills. Roll it to work at a particular profession, art, or trade.

Notes

Soldier

Whatever the technology or structure of their parent world, a soldier's work is universal. Your hero was a professional fighter, whether that took the form of a barbarian noble's thegn, a faceless conscript in a planetary army, or an elite soldier in the service of a megacorp's private military. Whether it was because they were on the losing side, choosing to leave the service, or being forced to flee a cause they couldn't fight for, they now find themselves navigating a world where their most salable skill is one that can cause them a great deal of trouble.

Tough as nails ex-military soldier (career, discharged with honor) woke up one morning missing his legs. Replaced with military grade anthro-cyber legs. Thoughts of revenge always bubble near the surface of his consciousness. Extremely competent and capable at space travel and mechanical engines. Terribly efficient in hand-to-hand combat. A little rough around the edges, but neutral good as this life is all about developing the skills to survive. If you can't help yourself, who will? Skeptical of authority (thinks the government may have had something to do with his missing legs), but understands its necessity for the masses to maintain order and keep the peace, even when force is required for the greater good.

+2XP (3/12/2025), +1XP(3/19/2025) = LEVEL 2!
