

# Combat Without Quarter

## Pew, pew-pew, the lasers sing

A **Combat Round** lasts **6 seconds**

Movement is **standard movement rate (norm 10m)**

When **encumbered**, movement **reduced 20%**

*Combatant turns are divided into 4 action types:*

♦ **Move action** (one per round)

♦ **Main action** (one per round)

♦ **On turn action** (any amount on turn)

♦ **Instant actions** (any amount, any time)

### Random Encounter Sequence

**1 DM** rolls for *Surprise*

**2 DM** rolls for encounter distance

**3 DM** rolls for enemy *Reactions*

**4** Unsurprised sides roll Initiative **1d8 + DEX**

**5** Unsurprised sides act in 1 combat round before others

### Instant Action [Any amount, any time]

May be performed even when not the actor's turn, even after attacks or damages have been rolled. Some psychic powers are *Instant Actions*, allowing actor to use them after they decide they don't like how the dice have fallen. Certain combat actions are also Instant, but *often cost the actor's Main Action for the round* as well. Any number of *Instant Actions* can be performed during a round

**Parting Shot** when an *Engaged* foe moves out of melee range without making a *Fighting Withdrawal*, with a Readied melee weapon make a free *Melee Attack*

**Make a Snap Attack** with a *Readied* weapon, make a melee attack or a ranged attack with a **-4** to hit. Must have an impending or available *Main Action* which will be lost on the character's turn

**Total Defense** by focusing on nothing other than avoidance, gain **+2 AC** and immunity to *Shock* until next turn. Must have an impending or available *Main Action* which will be lost on the character's turn

**Drop an Item** drop an item from hand to floor

### Move Actions [One per round]

**Hold an action** delay taking remainder of actions until later in the round as an *Instant Action*

**Run** move up to **standard movement rate** distance. If climbing, swimming, or crossing rough terrain, movement is halved and an *Exert* skill check *may* be needed. Starting from prone also halves distance.

**Club Up a Weapon** shift grip on a ranged weapon to use as improvised melee weapon. Attacks made with clubbed weapon deal no *Shock* damage with a rifle-sized weapon acting as medium primitive weapon and a pistol-sized weapons acting as small primitive weapon. Rolling maximum damage will break the weapon

**Pick up an item** scoop up item from floor with free hand leaving it *Readied* in grip

**Stand up** get up from prone position

### Main Actions [One per round]

**General Action** perform a non-combat task requiring focus for the entire round such as bracing a door or searching a cabinet

**Melee Attack** attack an enemy in melee range with a readied weapon. On a miss, unless target AC too high or a success would have done less damage, target receives *Shock* damage

**Ranged Attack** attack an enemy within range with a readied weapon. If target is armed and within melee range then two-handed ranged attacks are not possible and one-handed ranged attacks take **-4** to hit

**Push/Shove** move a foe up to 4m by making a successful *Punch* attack followed by an opposed *Punch* or *Exert* skill check. No damage is given

**Fighting Withdrawal** disengage from melee foes such that a subsequent move action doesn't trigger a free melee attack

**Use Skill** perform a quick skill-based action such as a INT/Heal or DEX/Heal, execute pre-programmed hack, give a rallying cry to NPCs, or anything similar that could be done during a single round

**Sunder Weapon** against *Engaged* enemy, make successful melee attack roll followed by opposed STR or DEX-modified skill check with Readied weapons giving target a **+3** bonus. On win, opponent is disarmed, on tie both are disarmed. On win by 3 or more, weapon can be taken with a free hand, otherwise weapon is knocked **1d4m** in random direction

**Ready or Stow Item** draw or holster a weapon, retrieve or store an item, or otherwise move an object around self

**Reload Weapon** swap readied power cell or magazine

**Run again** move additional **standard movement rate**

### On Turn Action [Any amount on turn]

Simple act such as dropping an object, saying something, drawing a Readied item, or activating a simple device

**Go prone** fall flat giving distanced, ranged enemies a **-2** to hit you but adjacent enemies gain **+2** to hit you

### Combat Situations

**Engaged** when a combatant is within the melee reach of an enemy readied a with melee weapon

**Surprise** ambushers roll **DEX/Sneak vs target WIS/Notice** Surprised target can only roll *Initiative* on second round and only make *Instant actions* in first round. Most **PCs** are not subject to surprise unless their guard is genuinely down at the moment of the ambush

**Assassination** given a full minute of preparation time without any notice, an attacker can make a maximum damage attack that ignores target **AC** (within reason) by either making a melee attack which always hits or by making a ranged attack by making a **DEX/Shoot skill check vs DC 6** for point-blank, **8** for normal range, or **10** for extreme range

**Two-weapon Fighting** two weapons may be *Readied*, one per hand, if the wielder has at least a level 1 in *Shoot* or *Stab* as appropriate for weapon types but only 1 may be used per round. Attacks are at **-1** but damage is increased by **+2**
